

AMENDMENTS TO THE CLAIMS:

This Listing of Claims will replace all prior versions, and listings, of Claims in the Application:

Listing of Claims:

Claim 1 (Currently Amended): A base of handheld device having Email access function, said base being capable of connecting to a computer or an information network to access Email data package of an Email and ~~then~~ displaying ~~the~~ a content of said Email via a display screen of a handheld device, said base comprising:

a casing having a control circuit board received therein, a plurality of electric contacts being disposed on said casing for data exchange between said handheld device and said control circuit board;

a control unit disposed ~~in~~ on said control circuit board, said control unit being controlled by said handheld device to download the Email data package of said Email ~~or~~ and to transfer the content of said Email to said handheld device;

a memory unit disposed on said control circuit board and controlled by said control unit, said memory unit containing ~~and used to store~~ a mail access program and ~~memorize~~ accessed data of said Email stored therein; and

a transmission unit ~~used~~ for digital information exchange between said control circuit board and the computer or the information network.

Claim 2 (Currently Amended): The base of handheld device having Email access function as claimed in claim 1, wherein said casing has a receiving groove formed thereon, for exactly receiving said handheld device being received in said receiving groove.

Claim 3 (Currently Amended): The base of handheld device having Email access function as claimed in claim 1, wherein said transmission unit ~~can be~~ includes an interface from a group consisting of an Ethernet interface, a modem interface, a USB interface, an RS-232 interface, an IrDA transmission interface, ~~or~~ and an RF transmission interface.

Claim 4 (Currently Amended): The base of handheld device having Email access function as claimed in claim 1, further comprising a mail discrimination unit, ~~which is used to discriminate~~ discriminating and classify classifying the content and format of said Email ~~and then store into~~ to be stored in said memory unit.

Claim 5 (Original): The base of handheld device having Email access function as claimed in claim 4, wherein said mail discrimination unit further comprises a mail buffer for temporarily storing data of said Email.

Claim 6 (Original): The base of handheld device having Email access function as claimed in claim 1, wherein said memory unit comprises:

a mail data storage area for storing data of said Email;

a mail index area for separately storing index record in the Email data package of said Email; and

a mail's appended file format area for storing appended files in said Email.

Claim 7 (Original): The base of handheld device having Email access function as claimed in claim 6, wherein the mail data stored in said mail data storage area comprises sender's data, receiver's data, theme, and mail content.

MR2349-791

Application Serial No. 10/072,927

Responsive to Office Action dated 25 January 2005

Claim 8 (Original): The base of handheld device having Email access function as claimed in claim 6, wherein the mail data stored in said mail data storage area is text data or HTML format data.

Claim 9 (Currently Amended): The base of handheld device having Email access function as claimed in claim 1, wherein said memory unit ~~is composed of~~ includes nonvolatile memory components.
